

Units & Box Model — Quick Reference

Length Units

- `px` — **fixed pixels, ignores window resize**
- `%` — **relative to parent's size**
- `% height` — **needs parent's explicit height**
- `vw` — **1% of viewport width**
- `vh` — **1% of viewport height**
- `100vw; 100vh;` — **fills browser window, no parent needed**

Box Model Properties

- `width, height` — **size of the content box**
- `padding` — **space between content and border**
- `border` — **line drawn around the padding**
- `margin` — **space outside the border**

box-sizing

- `content-box` (default) — **width/height = content only; padding & border add on top**
- `border-box` — **width/height include padding & border**

Center a Block Horizontally

1. Give it an explicit width
2. `margin: 0 auto;`

Profile Card Recipe

1. Wrapper — `width: 100vw; height: 100vh;`
2. Card — `width: 320px; padding: 24px; border: 1px solid #ddd; box-sizing: border-box; margin: 40px auto;`
3. Avatar — `width: 100px; height: 100px; margin: 0 auto 16px auto;`
4. Name(h2) — `text-align: center; margin: 0 0 8px 0;`
5. Bio(p) — `text-align: center; margin: 0;`
