

Bash and Terminal — Quick Reference

Navigation & Files

- `pwd` — **Print working directory**
- `ls` — **List directory contents**
- `cd <dir>` — **Change directory**
- `cd ..` — **Go up one directory**
- `mkdir <name>` — **Create a new directory**
- `touch <file>` — **Create an empty file**
- `cat <file>` — **Print a file's contents**

Copy / Move / Delete

- `cp <src> <dest>` — **Copy a file**
- `mv <src> <dest>` — **Move or rename a file**
- `rm <file>` — **Delete a file (irreversible)**

Vim Basics

1. `vi <file>` — Open the file in Vim
2. `i` — Enter Insert mode (start typing)
3. `Esc` — Return to Normal mode
4. `:wq` + Enter — Save and quit
5. `:q!` + Enter — Quit without saving

Key Terms

- **Terminal** — the window/app you type into
- **Shell** — bridge between what you type and the OS
- **Bash** — the most common shell program

Windows Setup

- `wsl --install` — **Install WSL (admin PowerShell)**
- gitforwindows.org — **Download Git Bash installer**
